In view of the malware and disinformation campaigns generated by the coronavirus pandemic, we advice you to follow these recommendations:

⚠️ Phishing

Pay special attention to the emails you receive. You will not receive the coronavirus vaccine by email.

Avoid opening attached documents about COVID-19 in the emails you receive.

Do not download unofficial applications to know the international scope of COVID-19.

⚠️ Desinformation

Do not disseminate information that does not come from official sources.

Do not contribute to the dissemination of unverified content.

Do not share messages that could generate alarm in population.
